

“Free” Monthly Night Inspections

(Sample Inspection Map Below)

Monthly night inspections e-mailed to our customer.

Preventative maintenance programs help manage liability issues.

Well maintained lighting systems offer better property appearance and are more inviting to your customers.

Replace a burned out lamp when noticed. Letting a ballast attempt to start a dead lamp night after night shortens ballast life.

LIGHTING, SIGN & ELECTRICAL SERVICES SINCE 1977

A Complete Line of Lift Equipment To Serve Every Exterior Lighting Need

This diverse fleet enables LMS to dispatch and only charge customers for the size vehicle their property requires.

The unique size of our exterior fleet along with our existing customer helps us keep costs low. Being “next door” means lower rates for you.

Fully Stocked Vehicles Means Better Service

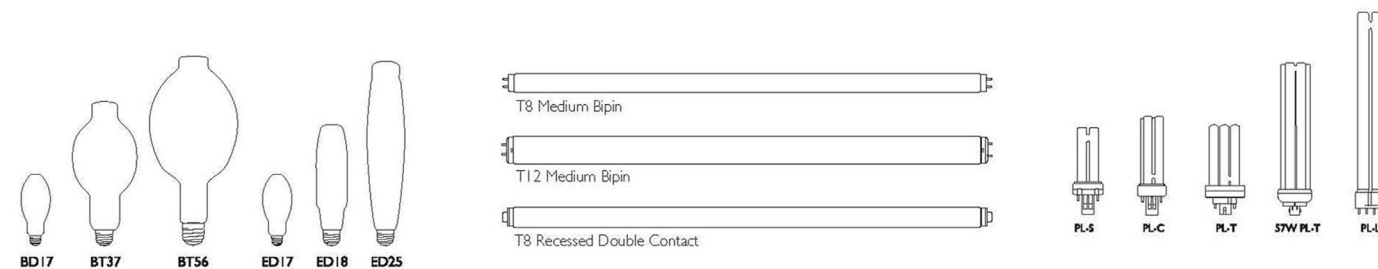

We have made the financial investment to fully stock all of our service vehicles. This means you won't have to pay us to drive to and from supply houses.

Over 30 years of experience has given us the knowledge to know what products to stock on these vehicles.

LIGHTING, SIGN & ELECTRICAL SERVICES SINCE 1977

National Level Material Pricing

LMS has established relationships with major lamp and ballast manufacturers. This allows LMS to purchase at “national” account levels which means lower costs for our customers.

Certified Lighting Technicians

LMS is a member and strong supporter of NALMCO. An association which, among other things, has an extensive certification program.

LMS puts all of its lighting technicians through this program

LMS employs several service electricians who are well trained in exterior lighting and electrical systems. They carry special tracing and metering equipment which makes them the most efficient service electricians along the Wasatch Front.
